## Core Competencies

## Professional Summary

Web & Mobile Developer specialising in scalable React Native applications and enterprise integrations. Experienced in modernising legacy systems, delivering cross-platform mobile platforms, and improving development efficiency through automation and AI-assisted tooling.

## Key Achievements

- Contributed to mobile and web platforms collectively serving **500,000+ users** across enterprise environments.
- Core developer on the **SMARTY mobile application**, supporting large-scale telecom services.
- Delivered **enterprise mobile solutions for Michelin**, supporting internal operational systems.
- Led the **migration of legacy mobile applications to modern React Native architecture**, improving maintainability and scalability.
- Engineered **automation-driven integrations between client stock systems and Oracle NetSuite**, improving operational efficiency and data consistency.

## Featured Projects

### SMARTY Mobile App, Blue Beck Ltd

2023 – PRESENT

**Tech Stack:** React Native - TypeScript - REST APIs - Git - Agile Development - AI-assisted development tooling

- Develop and maintain a large-scale React Native application supporting **iOS and Android users within a 500,000+ user ecosystem**.
- Strengthen long-term platform stability through structured code reviews, architectural improvements, and legacy modernisation initiatives.
- Deliver scalable integrations across mobile, web, and backend systems supporting telecom services.
- Present technical progress in client-facing meetings, helping align engineering delivery with business priorities.
- Improve developer efficiency by introducing **AI-assisted development tooling and workflow optimisation**.

### E-Commerce & NetSuite Integration, Interlockdigital

2022 – 2023

**Tech Stack:** Node.js - PHP - MySQL - XSLT - Oracle NetSuite - REST APIs - Cron Scheduling

- Engineered a programmatic integration between a client stock system and **Oracle NetSuite**, enabling automated data synchronisation.
- Built automated scheduling systems supporting stock and asset synchronisation across platforms.
- Developed dynamic **XSLT-driven order email workflows**, improving communication automation.
- Increased operational efficiency through automation and improved **real-time data consistency across systems**.

### Michelin Internal Mobile Applications, Interlockdigital

2021

**Tech Stack:** React Native - JavaScript - Alloy (Titanium) - REST APIs - Git

- Led development of a **React Native internal cost analysis application** used within Michelin's operational systems.

- Migrated legacy **Alloy-based mobile applications to modern React Native architecture**, improving maintainability and development efficiency.
- Delivered enterprise-grade internal tools supporting **cost analysis and operational auditing processes**.

### **Warmshowers Mobile App, Interlockdigital**

2020

**Tech Stack:** React Native - JavaScript - REST APIs - Git - iOS & Android Deployment

- Co-developed a cross-platform **React Native application released on iOS and Android**.
- Contributed to a platform serving a **global community of 150,000+ members**.

## **Employment History**

### **Developer, Blue Beck Ltd, Hybrid**

MAR 2023 – PRESENT

- Core contributor to the **SMARTY React Native mobile application**, supporting a large-scale telecom ecosystem.
- Improved codebase stability and reduced delivery risk through structured reviews, testing practices, and proactive resolution of unstable changes.
- Modernised legacy patterns to improve **scalability, maintainability, and long-term platform stability**.
- Enabled smoother cross-functional delivery across mobile, web, backend, and product teams within a complex technical environment.
- Presented technical updates in client meetings, helping align engineering decisions with business priorities.
- Integrated **AI-assisted development tooling** to improve developer productivity and workflow efficiency.

### **Senior Web Solutions Developer, Interlockdigital, On-Site**

JUL 2022 – MAR 2023

- Led client-facing mobile and web initiatives, modernising legacy frameworks and transitioning projects to **React Native architecture**.
- Delivered backend integrations including **automated stock synchronisation with Oracle NetSuite**.
- Built automation-driven systems improving operational efficiency and data reliability.

### **Junior Web Solutions Developer, Interlockdigital, On-Site**

MAY 2020 – JUL 2022

- Contributed to the development of commercial **React Native mobile applications published on iOS and Android**.
- Built automation tools and **WordPress integrations** to streamline client workflows.
- Supported backend systems and API integrations within an **Agile development teams**

## **Education**

### **Computer Science BSc, Staffordshire University, Stoke-on-Trent**

SEPT 2019 – MAY 2022

Grade: 1st Class Honours.
